

MENTAL HEALTH RESOURCES

BECK DEPRESSION INVENTORY (BDI)

About: This scale is a self-report measure of depression.

Items: 21

This questionnaire consists of 21 groups of statements. Please read each group of statements carefully, and then pick the one statement in each group that best describes the way you have been feeling during the past two weeks, including today. Circle the number beside the statement you pick in each group. If several statements in the group seem like they apply to you equally well, please circle the one with the highest number. Be sure that you do not choose more than one statement for each group,

Scoring:

Once you have completed the questionnaire, add up the score for each of the twenty-one questions by counting the number to the right of each question you marked. The highest possible total for the whole test would be sixty-three. This would mean you circled number three on all twenty-one questions. Since the lowest possible score for each question is zero, the lowest possible score for the test would be zero. This would mean you circles zero on each question. You can evaluate your depression according to the Table below.

Total Score	Levels of Depression
1-10	These ups and downs are considered normal
11-16	Mild mood disturbance
17-20	Borderline clinical depression
21-30	Moderate depression
31-40	Severe depression
over 40	Extreme depression

My total score is : _____

BECK DEPRESSION INVENTORY (BDI)

Circle the number in each group of statements that best explains how you have felt over past two weeks, including today. Please only circle one number in each group.

1. Sadness

- 0 I do not feel sad.
